

ASSET MULTIPLATE® MP200

asset MultiPlate® is a construction system based around corrugated, curved, galvanised steel sheets which are bolted together to form durable structures or part structures, that can be deployed in a variety of civil engineering applications.

SUITABLE APPLICATIONS:

Pedestrian underpasses

Culverts

Bridge restrengthening

ASSET BAFIX™ BALLAST RETENTION

asset BaFix™ provides an innovative track ballast shoulder retention system for the rail industry. The key benefit of installing the system is retaining the loss of ballast over time whilst creating a long-term stable border for the ballast.

SUITABLE APPLICATIONS:

Railway tracks

ASSET BEBO® CONCRETE ARCH

The **asset BEBO® Concrete Arch** is a standardised patented precast arch system for the design and construction of earth overfilled bridges, tunnels, culverts and green bridges.

SUITABLE APPLICATIONS:

Road bridges

Bottomless Culverts

Rail bridges
